

Andrea Peltokorpi

Full-stack developer based in Oulu with 6+ years of professional experience. Detail-oriented (some might say nitpicky) and able to ramp up fast on unfamiliar stacks. When something catches my interest, I dig deep until I understand it.

Strong frontend skills in React/TypeScript, backend experience spanning Node.js, Clojure and PHP/Drupal, with PostgreSQL and AWS experience. Interested and experienced in integrating AI development tools into daily workflow.

EXPERIENCE

2022—Present

IBM • *Formerly Nordcloud*

Application Developer

Full-stack development on multiple public sector projects.

Multi-year development on a transport infrastructure management system. Built on AWS with Clojure, TypeScript and React.

Primary developer on a critical railway infrastructure feature, coordinating with stakeholders across multiple organizations. Built on AWS with TypeScript, React and PostgreSQL.

2020—2022

Exove

Developer

Full-stack development across multiple public-facing projects. Primarily Drupal/PHP with JavaScript, React, Node.js.

EDUCATION

2021

Bachelor of Science

Information processing science
University of Oulu

HOBBIES

Storytelling across different media — video games, films, tabletop RPGs. And finding any possible excuse to make a spreadsheet.
